SAFETY---is a Noun.

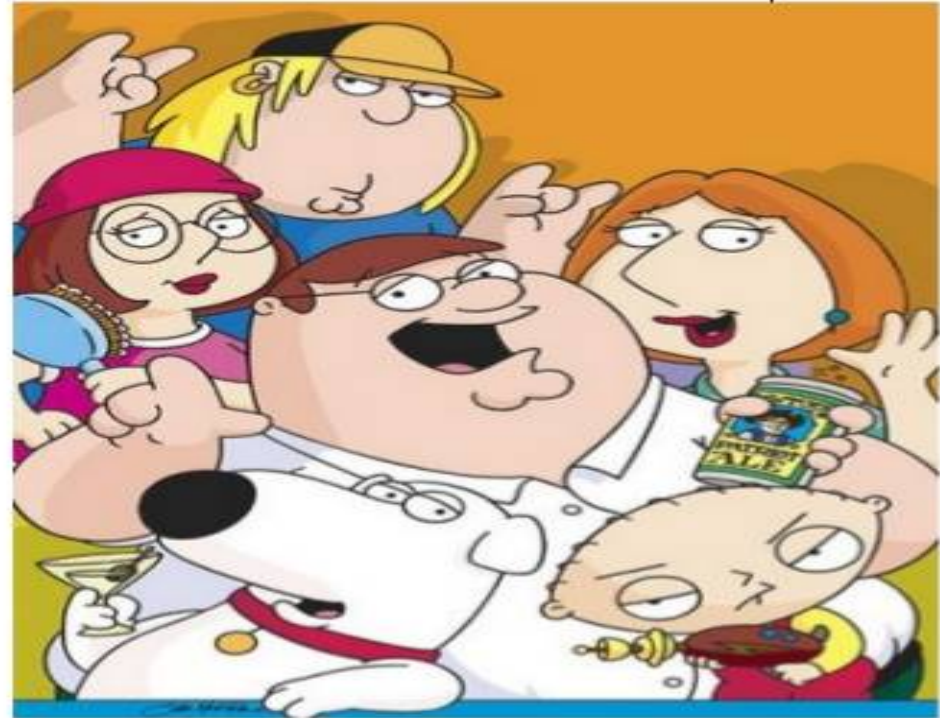

It is the condition of being protected from or unlikely to cause danger, risk or injury.

(Safety is EVERYONE'S Job, So Think Safety,
Think Safe) THINK SAFETY AT ALL TIMES

Why Work Safely?

- Work safely for the most important people in your life, your family.
- Work related injuries cause not only time away from production activities at work but also time away from activities with your family.

RESPONSIBILITY is the state or fact of having a duty to deal with something or of having control over someone. It is also the opportunity or ability to act independently and make decisions without authorization.

And..

The employee **ACCOUNTABILITY** is the responsibility of the employees to complete the task they are assigned, to perform the duties required by their job, and to present for their proper shifts in order to fulfill or further the goals of the organization.

Accountability

There were four people and an important job to be done.

Everybody

Anybody

Somebody

Nobody

Nobody knew that Everybody was not going to do it.

Everybody was sure that Somebody would do it.

Anybody could have done it.

In the end, Nobody did it.

**We cannot
become what
we want to be
by remaining
what we are.**

- **Accountability** is not only what we do, but also what we do not do, for which we are accountable.
- Accept **Responsibility** for your own actions, be accountable for your results and take ownership of your mistakes.

Why Work Safely?

Always work safely for the most important people in your life and family. Work related injuries can cause not only time away from production activities at work but also time away from activities with your family.

What is working safely?

- Wearing the proper and required PPE (Personal Protective Equipment)
- Completing every task the correct way, not taking hazardous shortcuts
- Paying attention the task at hand
- Asking for instructions when completing unfamiliar tasks
